# **Fast Thinking An R & E Network Renaissance**

**Draft 4.0**

Volume XIX, No.s 11-12, XX, No.s 1-5  
February - August 2011  
ISSN 1071 - 6327

## Contents

### Part 1

## *How Human Ingenuity, DIY Technology, and Global R&E Networks Are Remaking the World*

<b>Abstract</b>	p. 11
<b>Introduction: The American Political Context</b>	
The Quiet Coup	p.12
Becoming a Banana Republic	p.13
The Wall Street–Washington Corridor	p.14
Susceptibility to Systemic Shocks	p.14
Outcome Will Be the Hollow State	p.15
The Network and Local Resilience	p. 17
 Chapter 1	
<b>Collaboration Networks: the New Glue in a World of Failing Nation States?</b>	
Consider Then What Lies Ahead	p. 18
What about the Rest of “Us”?	p. 19
Absolute Necessity of Grasping Transformative Impact of Technology on National Economies	p. 21
Role of U. S. UCAN Network in Uniting Research & Education with the Rest of America	p. 24
Thumbnail Sketch of the European & American Situation	p. 25
A Scenario of What is Possible	p. 28
The Power of the 20 <sup>th</sup> Century “Center” Leaks to the 21 <sup>st</sup> Century “Edge”	p. 29

<b>Open Everything Brings Major Change</b>	<b>p. 30</b>
<b>Civilizing the Economy: A New Economics of Provision</b>	<b>p. 32</b>
<b>Economic Disconnect Addressed by Two Stories</b>	<b>p. 33</b>
<b>Creation of Economic Value Moves from Proprietary Silos to Collaboration Infrastructures</b>	<b>p. 34</b>
<b>Getting Better Faster by Working Together and By Creating New Architectures</b>	<b>p. 35</b>
<b>The Economy Must be Freed from Dependence on Scarcity Communications</b>	<b>p. 37</b>
<b>Collective Intelligence</b>	<b>p. 37</b>
<b>Bridging the Gap Between High End and Local Community</b>	<b>p. 38</b>

## Chapter 2

# The R&E Networks in the Rest of World: National & Task Oriented

Europe, Asia- Pacific, China, India, Canada **p. 41**

## The United States

<b>Early History of I2 and NLR</b>	<b>p. 42</b>
<b>National Lambda Rail</b>	<b>p. 43</b>
<b>The Merger Imbroglia</b>	<b>p. 45</b>
<b>US UCAN – a New Beginning</b>	<b>p. 46</b>
<b>Internet2 K20 Initiative</b>	<b>p. 52</b>
<b>The Civic Applications</b>	<b>p. 54</b>
<b>The NSF and Cyber Infrastructure Office</b>	<b>p. 58</b>
<b>Significant American Researchers</b>	<b>p. 60</b>
<b>The 10<sup>th</sup> Annual Global LambdaGrid Workshop</b>	<b>p. 65</b>
<b>Modern Research Needs an Integrated ICT Infrastructure: an Eco-system</b>	<b>p. 66</b>
<b>The American Model Versus the Netherlands</b>	<b>p. 67</b>
<b>The Future</b>	<b>p. 68</b>
<b>A Cautionary Note</b>	<b>p. 69</b>
<b>Survey of Internet2 Services and Activities</b>	<b>p. 71</b>

<b>Collaboration with DICE, GLIF and Joint Engineering Team</b>	<b>p. 74</b>
<b>Federated Identity Management</b>	<b>p. 74</b>
<b>Scientific Outreach</b>	<b>p. 77</b>
<b>Gratia Accounting</b>	<b>p. 77</b>
<b>Remote Instrumentation &amp; Data Visualization Tools Working Group</b>	<b>p. 78</b>
<b>An Example of a State BTOP Grant -- Michigan</b>	<b>p. 79</b>

### Chapter 3

## **GLIF and SURFnet – a Parallel History of Infrastructure Development**

<b>Interviews with Erik - Jan Bos, CTO of SURFnet</b>	<b>p. 85</b>
<b>Fiber Acquisition in the Netherlands</b>	<b>p. 88</b>
<b>Cross Border Fiber in Europe</b>	<b>p. 90</b>

## **GLIF -- The Beginnings and Organizational Structure**

<b>Open Protocol Issues and GLIF Inclusive Philosophy</b>	<b>p. 96</b>
<b>GLORIAD</b>	<b>p.103</b>
<b>Automation of Lightpaths for the Integrated Collaboration Facility</b>	<b>p.104</b>
<b>The Collaboration Infrastructure - SURFconext</b>	<b>p.104</b>
<b>Collaboration Infrastructure Software: Science Without Borders</b>	<b>p.105</b>
<b>How GLIF Provisions its Bandwidth</b>	<b>p.108</b>
<b>How SURFnet Enables Innovation</b>	<b>p.110</b>
<b>K-12 Education in The Netherlands</b>	<b>p.114</b>

### Chapter 4

## **The Collaboration Infrastructure in Detail**

<b>OpenDrac</b>	<b>p.115</b>
<b>Enablers of Cyber Infrastructure</b>	<b>p.117</b>

Increasing Collaboration	p.124
Trusted Identity Management	p.129
Defining the Online Collaboration Environment	p.137

## Chapter 5

# Supercomputing - the Eco-System Pinnacle

<i>The Role of SARA, The Dutch National Supercomputer Center</i>	p.143
--	-------

The Ecosystem Pyramid	p.145
Figuring out What You Need for Resources	p.147
Tuning the Machine	p.150
Multi Disciplinary Teams and Blue Brain	p.154
Need for Petascale Computing	p.155
Supernode and SARA Reorganization	p.159
Commercial Spinoff and Green Energy Concerns	p.162
Impact of Collaboration infrastructure on SARA	p.167

## Where the Global Supercomputing Eco System is Headed

<i>Sustained Petascale computing in US and Switzerland</i>	p.168
Switzerland	p.171

## Executive Summary

p.176

## PART 2

### *The Emergence of a Global Collaborative “Operating System”*

Introduction	p.181
The Collaborative Architecture of Grids	p.184

## Chapter 6

## **The Grid Ecosystem an Architectural Overview**

*Maurice Bouwhuis*

Computational Eco-systems	p.185
The User and Software Perspective: Interfacing with the Grids	p.189
Communication and Collaboration is Transitioning from Point-to-Point to Fabrics of Grids	p.191
The Eco System Enabling the Data intensive Scientist's Work	p.192
The Physical Architecture of the CPU and Data Intensive Grid in Amsterdam	p.193

## Chapter 7

## **Understanding the Workings of the Global Ecosystem Architecture**

*Steven Newhouse*

Looking Under the Hood of the Grid Infrastructure	p.196
The Grid Services Software Stack Decides What Happens Where and When	p.199
Jumping into the GLIF Presentation on EGI Grids in North America?	p.202
	p.206

## Chapter 8

## **BiG Grid as the Dutch National e-Science Infrastructure**

*Arjen van Rijn*

The Dutch Eco-system and its Evolution	p.210
Organizing Large Scale Collaboration	p.211
Why Collaboration?	p.213
A Business Model?	p.215
Summing Up -- Big Grid Information, Infrastructure,	P.216

and User Communities	p.220
Alexandre Bonvin's Netherlands - Italian e-NMR GRid Project	p.224

## Chapter 9

### **Distributed ASCI Supercomputer (DAS)**

#### ***Henri Bal and the Computer Science Testbed/Grid***

Editor's Introduction	p.226
DAS-3 Runs Independently from Big Grid	p.229
IBIS - a Language for Real World Distributed Computing	p.232
Demonstration – Distributed Hierarchical Heterogeneous Computing	p.234

## Chapter 10

### **Life Sciences as an Immature Field**

#### ***An Introduction from Bob Hertzberger***

Genomics Is Relatively New in the Netherlands	p.246
Life Sciences – a Young and Not Yet Stable Field	p.249
Lacking Enough Understanding to Enable Predictive Models	p.252

## Chapter 11

### **Looking for Structure in the Life Science Wars**

#### ***Timo Breit's Micro-array Transcriptomics***

The Many Nuances of Eco System Thinking	p.255
Bringing Computational Science to Bear on a Problem of Unbearable Complexity	p.260
Onward to e-Science	p.263

## Chapter 12

### **The Gap**

#### ***The Hard Place Between Biology, Systems Biology and Economic Benefit - Brian Hanley***

Editor's Introduction	p.274
A Different Point of View	p.275

The Computing Environment of Biology	p. 276
Genomics as a focus of Systems Biology	p. 277
The Medical-Industrial Complex and Economic Payoff to Society	p. 281
A Very Short Biography and Comments on My Doctoral Program	p. 284
My Point of View on the Preceding Two Chapters	p. 287

## Chapter 13

# ***Ecologies of Birds, Plants and Animals***

<b><i>Willem Bouten Computational Geo Ecology</i></b>	p.292
Computational Geo-Ecology	p.293
The Fly Safe Bird Avoidance Model	p.295
The Military Radars	p.299
Tracking with GPS Backpacks Mounted on Birds	p.301
Bird Migration	p.304
Our Specific Bird Tracking Projects	p.306
Data-driven Models - Migration of Storks	p.310
Visualization of Our Data	p.315
Let's come back to Our Other Virtual Laboratories	p.316
Exploring the Economic Implications	p.320

## Chapter 14

# ***Virtual Collaboration for Research in Humanities and Science***

## ***The Virtual Research Environments Program at JISC For Universities in the United Kingdom - F. Van Till***

	p.325
The Role of JISC in UK Higher Education	p.326
VRE - Presenting the Three Phases	p.328
What is a Virtual Research Environment?	p.329
First phases, VRE1 and VRE2	p.330
Documenting the Projects as a Teaching Tool	p.334
VRE2 - Focusing on Four Pilots	p.335
The Four Stage Two Pilots	p.336
Acquiring Users via Delivery of Productive Easy-to-use Tools	p.338

SDM VRE - VRE for the Study of Documents and Manuscripts	p.340
My Experiment: well-structured science	p.342
CREW - Collaborative Research Events on the Web	p.344
Small Tools	p.349

## Chapter 15

# Designing the Network for the Mother of All Grids

<i>David Foster on the World Wide LHC Computing Grid OPN</i>	p.353
A Star Network Where its Strength Lies in its Simplicity	p.354
The Complexity of the Tier-2s	p.362
Federated Flexibility	p.364
How the New Architecture Was Nurtured	p.365
An Open-Ended Model	p.369
LHC Open Network Environment	p.370
Access methods	p.370

## Chapter 16

# At a Critical Moment in American History New R&E Leadership at Internet2

<i>Interview with I2 CEO Dave Lambert</i>	
Early Career	p.372
Owning and Lighting Fiber	p.373
The Way Forward	p.375
Collaboration Tools and Grid Middleware	p.377
Technology and a New Culture of Learning	p.379
The US UCAN Opportunity	p.381
Extending a Helping Hand	p.384
Role of the Incumbents in U.S. UCAN	p.385

## Chapter 17

**Conclusion -- At a very Difficult Time, the Necessity of Informed Choice**

<b>Communities will Need the Network Resources</b>	<b>p.389</b>
<b>R&amp;E Networks Married to Political Reality</b>	<b>p.392</b>
<b>Ask Yourself Where You Stand</b>	<b>p.393</b>

## Chapter 18

**Why Hope is Alive: US UCAN's Investment in Our Own Communities** **p.395**

<b>A National Strategic narrative</b>	<b>p.396</b>
<b>A Non Partisan Blueprint for Understanding Changes of 21<sup>st</sup> Century At Stake is the Future of local Higher Education, Libraries and Schools</b>	<b>p.397</b>
<b>Wanted a US UCAN Strategy</b>	<b>p.403</b>
<b>Fast Strategic Thinking Needed</b>	<b>p.404</b>
	<b>p.405</b>

**Executive Summary** **p.408****Appendices**

<b>(A) Some Data on Star Plane and Das 3</b>	<b>p. 412</b>
<b>(B) Das 4 Overview</b>	<b>p. 417</b>
<b>(C) Relevant URLs from Late March to Early April 2011</b>	<b>p. 419</b>
